Art Unit: 1711

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Porter.

Porter, in example 2, discloses polyurethane foam made from polyisocyanate, polyol, water as the blowing agent, tin and amine catalysts and an anhydride in the amount of the claims. When a reference teaches a product that appears to be the same as a product set forth in a product-by-process claim but prepared by a different process, the burden of proof is shifted to the applicant (in re Marosi, 218USPQ 289).

4. Applicant's arguments filed 1-6-04 have been fully considered but they are not persuasive. The applicants argue the importance of mixing the anhydride with the polyisocyanate component versus with the surfactant shown by Porter. Porter shows the mixture of anhydride and surfactant as stable, implying that the anhydride remains in the mixture. The applicants argue that if the anhydride is mixed with the polyol and water, it hydrolyzes and won't stabilize the foam on aging. Porter quickly mixes and reacts the ingredients the same way as the applicants. The applicants argue that

Art Unit: 1711

Porter is silent about the density of the foam. The examiner maintains that the foam formulation is so similar to that of Radovich's mattress foam of the same density as the claims.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rachel F. Gorr whose telephone number is 571-272-1072. The examiner can normally be reached on Mon., Tues., Thurs., Fri., from 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jim Seidleck can be reached on 571-272-1078. The fax phone Art Unit: 1711

number for the organization where this application or proceeding is assigned is 703-872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
